24 hours a Day – 365 days a year

Phone No: (0030) 2645360244

APPOINTMENT SERVICE

Monday – Friday 09:30 a.m. – 14:30 p.m.

Phone No: (0030) 2645360216

Dear patients and visitors : The Medical – Nursing –Paramedical and Administrative staff of the Outpatients’ Department and the Accident and Emergency Department, sympathizes with your distress and agony and assures you of doing its best for your convenience and treatment.

During your staying in the Outpatients’ Department – Accident and Emergency Department and in the Short Stay Rooms, you are kindly requested to:

- Inform the persons in charge for your identity data (name, surname, father’s name, address, telephone number)
- Mind your personal belongings, at your own risk.
- Respect the smoking ban in the interior (N.3730/ΦΕΚ 262^A / 23.12.2008)
- Please inform the Medical and Nursing staff, about possible diseases, chronic conditions and medication.

- You must absolutely provide information that are requested by the Doctors or the Nurses, in our hospital.
- Keep all areas and the premises, clean.
- Do not keep food or flowers in the Departments and the Short Stay Rooms.
- To avoid microbial transmission to the patients and for your own safety, follow the instructions about your hand hygiene.
- Please keep quiet. Avoid the use of self phones and loud conversations.
- Respect the other patients' health condition. Keeping quiet is and must be the main characteristic of every Hospital.
- Be patient and show understanding if your scheduled medical examination changes or delays. This will only happen if there's an important reason. Do not forget that Outpatients' Department and Accident and Emergency Department are housed together.
- CAUTION: Do not park your car in front of the entrance of the Emergency Room. Parking there against the law, makes it difficult for other vehicles (including ambulances) to go around easily. The Highway Code is applicable to everyone.

In order to assure the best function of the Department, to avoid infections, to protect the patient's decency and privacy, it is not allowed to escorts to enter the examination rooms, during the patient's medical examination. If special reasons impose the opposite, please inform the person in charge or the Head nurse of the shift.

- The medical treatment expenses are covered by your insurance carrier.
- If you have no insurance policy, please contact with the Administrative Department.

- Remuneration of any kind towards any individual for any reason, is illegal and insults the employees.

ACCESS TO MEDICAL FILE / DOCUMENT APPLICATION

After your exit from the hospital, you, or a legal representative of yours (a child's parent, legal advisor) or a legally authorized representative (a lawyer acting on behalf of you, a relative, or a third person) has the right to apply for a copy of your Medical File. Please address to the secretary's office of the Outpatients' Department.

- **Hospital stay Certificate / Medical Report.** Estimated time of processing, depends on the Clinic that issues the certificate.
- **Certificate of Visit to the Accident and Emergency Department .** Estimated time of processing, 3 weekdays.

Your opinion counts: Do not hesitate to point out your suggestions, complaints or positive comments, concerning your experience, by filling in the special forms of our Department.

ACCIDENT AND EMERGENCY DEPARTMENT

Accident and Emergency Department (E.R.) is housed along with Outpatients' Department on the ground floor of the Hospital. The Accident and Emergency Department serves only the emergencies. Therefore for the proper functioning of the Department and the best service of our fellow people, dealing with sudden, unpredictable, life threatening problems, you shouldn't arrive at the E.R. : To deal with Chronic health problems, with a sore throat

or a persistent cough, to prescribe medicine, to check on your blood pressure, to change bandages to preexistent injuries or to avoid the procedure of setting an appointment, etc. All the above can be handled at the Outpatients' Department or at a Health Center.

At the E.R. we provide Services for Emergencies and life threatening problems that might occur suddenly and unpredictably.

In order to accomplish this, your help is necessary. It's important for you to know the way we work, so that you can use correctly and efficiently our Department's services.

The service - assistance priority at the E.R. is defined by the severity of the patients' problems and not by the attendance series.

As soon as you arrive at the E.R. the reception doctor or Nurse will collect information about your health history, will estimate the severity of your health condition, will measure your vital points and according to the Rated Early Warning International method, you'll have the proportionate access and waiting time.

RATED EARLY WARNING SYSTEM

R E W S	MINIMUM FREQUENCY OF PATIENT'S	REGISTER'S ACTION	DOCTOR'S ACTION
----------------	---	------------------------------	----------------------------

	EVALUATION		
3 - 5	Every 4hours	Nurse's Updating	
6	Every 4hours	Doctor's Updating	Doctor's visit Every 1hour
7 - 8	Every 1hour	Doctor's Updating Possibility of Constant evaluation	Doctor's visit Every 30 min. Coordination with the doctor in charge.
> 9	Every 30min	Doctor's Updating Start Constant Evaluation	Doctor's visit Every 15min. Coordination with an ICU doctor.

For as long as we deal with heavy health incidents, the patient's relatives are not allowed to gather at the waiting or the treatment rooms, because they'll disturb doctors and nurses who need more free space and less tension, in order to be more efficient.

Please support us with your cooperation and understanding, so that we can assist you faster, efficiently and in the best way.

EMERGENCY CALL FOR AMBULANCE

1. Dial Phone No **166** .
2. Provide the exact address and patient's, or injured person's, location.
3. Inform the operator about the telephone number, you're calling by.
4. You must let the operator know if the patient is unconscious or not breathing.
5. Please don't hang up the phone, due to panic.
6. The operator or the rescuer will probably ask for more, important information and will provide you valuable information concerning basic medical assistance, until the ambulance gets there.
7. If it's about a car crash, it is very important to know the exact number of the injured persons, if there are heavily injured or trapped in vehicles, before an ambulance is sent at the place of events.
8. It's best to spent some minutes collecting important information and get to you with all the necessary help and equipment, than get there fast, without having the suitable means to help you.
9. Usually because of the panic, we overrate the severity of an injury and call for an ambulance unnecessarily, or because we think of our convenience. Answer all the operator's or rescuer's questions calmly. Let's not deprive an injured or sick fellow man, who's in danger, of the ambulance, because of our panic. Don't forget : **AN AMBULANCE IS NOT A TAXI.**
10. The doctor or the E.R. Nurse, will provide you all the necessary advice of how you should transfer a patient and if it's important to transport him or her by ambulance.

11. If you're in a place that you don't know its name, or the exact location, dial the European Emergency Number **112**.
